

SECUREDECK<sup>MC</sup>,  
ENGINEERED FOR  
YOUR PEACE OF MIND

YOUR SECUREDECK<sup>MC</sup> APPLICATION

## WHO IS DANDECK®?

Dandek® is the composite floor specialist for the trucking and rail industries. Dandek® develops and commercializes a unique line of patented products to secure your loads, protect your personnel and preserve your assets.

Dandek® is revolutionizing the commercial transportation industry with its SecureDeck™ product line. No other product offers a more complete combination of benefits within the industry.

Polymer is a fundamental component of SecureDeck™. It provides a number of advantages in terms of adherence, resistance, protection and ease of maintenance.

SecureDeck™ has proven its merit over the last few years with leading organizations such as Hydro-Quebec, BMR, RONA, Transport Québec, TransForce, Gaz Métro, the City of Montreal, the STM (Société de Transport de Montréal) and the Canadian National (CN).

## WHAT ARE SECUREDECK'S™ COMPONENTS?

SecureDeck™ floor solution cleverly combines three components:

### POLYMER

A unique and innovative polymer layer that is available in various chemical compositions, thicknesses, hardnesses and surface designs, made of recycled material.

### ADHESIVE

An exclusive adhesive that permanently bonds the polymer to floors, regardless of whether they are made of wood, steel or aluminium.

### SEALER

A urethane sealer that keeps the surface watertight.

## WHY CHOOSE THE SECUREDECK™ LINE OF PRODUCTS?

SecureDeck™ significantly increases the adherence of your floor, provides an exceptional durability and facilitates maintenance. The SecureDeck™ product line includes various solutions and can easily be adapted to different vehicle applications.

Its characteristics permit you to secure your loads, protect your people, preserve your assets, in addition to saving time and money.

## BENEFIT FROM A NUMBER OF ADVANTAGES

### SUPERIOR ADHERENCE LEVEL

- SecureDeck™ facilitates and speeds cargo loading and securement.
- SecureDeck™ assures a superior level of stability and improved load securement. It reduces the necessity to resort to other cargo securement devices and methods. With SecureDeck,™ it is easier to comply to the most recent North American cargo securement standards. »»»»

### SUPERIOR ADHERENCE LEVEL (SUITE)

- SecureDeck™ reduces work related injuries, including forklift skids and staff falls, especially when the surface is inclined, wet, icy or snowy.
- SecureDeck™ absorbs impacts and reduces vibrations, thus reducing load damages and their resulting claims.

### EXCEPTIONAL ENDURANCE

Wood floors have a tendency to shrink and form cracks thus reducing its effectiveness. Eventually, dirt, water and abrasifs infiltrate and accelerate the decay of floors, lead to the corrosion of the structure, and result in load damages.

- SecureDeck™ provides an even, uniform, watertight surface, that does not consist of interstices thus preventing corrosion and decay. In addition to this, surface damage is eliminated. Hence, your floor will no longer have waves, ripples, craters, bumps, and grooves, and there will no longer be any structural deformities. This results in an increase in the life span of your assets and reduces your repair and maintenance costs.
- SecureDeck™ has a three year warranty, when it is installed by an authorized dealer.

### EASE OF MAINTENANCE

Dry vans, platforms and flatbed trucks all require tedious maintenance. With SecureDeck™, all you need is a broom or a water hose to clean its surface.

In addition to this, since ice and snow do not adhere to the polymer's surface, the time required to deice and remove snow from platforms is considerably reduced. Hence, you save time and money.

### ADAPTED TO YOUR NEEDS AND TO DIFFERENT TYPES OF VEHICLES

- SecureDeck™ can be installed on any surface, regardless of whether it is made of wood, steel or aluminium.
- The SecureDeck™ product line is available in various chemical compositions, thicknesses, hardnesses and surface designs. Our dealers have all been trained to recommend the optimal configuration for your needs and type of vehicle.
- Our authorized dealers can recommend and install SecureDeck™ on any new or existing floor, or any recently repaired or refurbished floor.
